

## IBC 2013

Kære kunde !

Nu da IBC 2013 er bag os vil vi gerne via denne mail vise dig de nyheder som Vocas viste på udstillingen.

Kontakt os gerne for yderligere oplysninger, tilbud eller demonstration.

Med venlig hilsen

Team Holmberg

---

### Universal shoulder base plate

First up is a new shoulder base plate based on the highly successful Vocas "[shoulder base plate for the Sony PMW-F5/F55](#)".

This new variation features several improvements which makes this shoulder base plate compatible with a lot more cameras such as the Canon EOS C100/C300/C500, Red Scarlet/Epic and the Blackmagic Cinema Camera.

The specific product features are:

- Height adjustable front 15mm rails
- Optional rear 15mm rails (also height adjustable)
- Horizontally adjustable soft rubber shoulder pad
- Integrated rosette attachments
- Integrated dove tail balance plate system for use on tri-pods
- Also available with combined 15mm and 19mm rail front section

### Wooden grip with switch

This new version of the Vocas wooden handgrip is fitted with a remote start/stop switch.

To use this switch, the handgrip needs to be connected using a camera specific cable.

- [Remote cable for Sony PMW-F5/F55](#)
- [Remote cable for Arri Alexa](#)
- [Remote cable for Canon EOS C100/C300/C500](#)

### Remote switch for 19mm

This remote switch fits on any 19mm or 20mm tube, such as those found in the Vocas leather handgrips.

This means that you can now send a start/stop signal to your camera from the comfort of the Vocas leather handgrips. (The switch needs to be connected to your camera using the same remote cables as for the Vocas wooden handgrip with switch.)

### **Mic. holder**

This Microphone holder can be attached to standard 15mm top rails, such as those found in the Vocas Top handgrip for the Sony PMW-F5/F55. It's compatible with all standard 1/4" and 3/8" based microphone shock mounts.

### **FS700 adapter**

This adapter plate attaches directly to the bottom side of the Sony NEX-FS700 and allows the use of the Vocas Base plate for Sony PMW-F5/55 on this camera.

### **PMW-F3 adapter**

This adapter plate attaches directly to the bottom side of the Sony PMW-F3 and allows the use of the Vocas Base plate for Sony PMW-F5/55 on this camera.
